Objective

Seeking a technology-driven role where I can grow quickly and contribute to building innovative solutions. Eager to apply my technical skills to support organizations in solving problems and driving meaningful impact.

Education

King Saud University

Bachelor of Science - BSc, Software Engineering

08/2021 – 05/2025

GPA: 4.80/5 – Excellent with First Class Honors

Volunteer Experience & Communities:

- Contributed over 200 hours to various clubs, developing leadership, project planning, and teamwork skills while organizing impactful events and initiatives.
- Team Lead, Google Developer Student Club
- Member, Future Technology Club

Professional Experience

Boston Consulting Group (BCG)

Fellow

03/2025 – present

- Selected among the top 100 students across the Kingdom for BCG's prestigious 6-month Jeel Tamooh program
- designed to empower the next generation of leaders through a focus on leadership, strategic problem-solving, and professional development via mentorship and hands-on consulting experience.

stc

AI Engineer Internship

06/2024 – 01/2025

Riyadh, Saudi Arabia

- Developing AI and Generative AI applications using state-of-the-art technologies and frameworks
- Collaborated closely with senior developers, consultants, and cross-functional teams on company projects, gaining hands-on experience and contributing to real-world projects
- Worked closely with the biggest cloud providers such as Google Cloud and Microsoft Azure in Workshops and Proof of Concept (PoC) evaluations to deploy AI models
- Designing ETL processes to streamline database migration and integration between data warehouses and application databases
- Conducting Design Thinking workshops with stakeholders to refine and align solutions with their needs and expectations

Projects

Tashalih

- A platform to revolutionize the used car parts industry.
- Exhibited at LEAP 2025, showcasing Tashalih to global tech leaders, investors, and innovators, gaining valuable feedback and fostering key industry connections.
- Conducted market research by engaging with customers, dealers, and delivery agents to identify challenges and design a solution that meets their needs.
- Developed using Django, React.js, PostgreSQL, and Docker, deployed using Amazon AWS.
